**Objective of the Course/ Course Outcome:** The growing importance of English has impacted its Teaching-Learning throughout the world. The English learning population have vastly increased over the years and hence there has been mushrooming of institutions trying to cater to this ever-increasing demand supply gap. Non availability of a standardized curriculum that serves the need of students desirous of up-scaling their skills along with pursuing their rigorous academic career has mandated the start of this very popular course named Functional English. Our broad objective is to offer the students some unique tips in enhancing their listening, speaking, reading, writing and study skills. This Programme seeks to enhance the English proficiency of the students so that they can stand out in their social and academic spheres and also equip them to communicate with confidence and fluency on a range of issues that concern their daily lives. - Gain awareness of certain grammatical structures so that the students can paraphrase and edit their language.
- Practice the various skills through appropriate texts and activity types.
- Manage daily interactions such as greetings, introductions, shopping and traveling and so on.
